and Copyright Law Lasantha Ariyaratna,2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas

between copyright and streaming often make end users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part. Conversely, the fair dealing defence in Australia cannot be used aptly to defend end users' acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire or research or study. When considering a temporary copy exception, end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature. Moreover, the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking. End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website blocking laws have emboldened copyright owners while suppressing end users' access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions. *ProQuest Controlled Vocabulary and Classification Codes*, 1997

Digital Media & Intellectual Property Nicola Lucchi, 2007 **The Trade Marks Journal**, 2000-01-05 *International Legal Materials*, 1995 Football in the Middle East Abdullah Al-Arian, 2022-08-10. Far and away the most popular sport in the world, football has a special place in Middle Eastern societies and for Middle Eastern states. With Qatar hosting the 2022 FIFA World Cup, this region has been cast into the global footballing spotlight, raising issues of geopolitical competition, consumer culture and social justice. Taking an interdisciplinary approach, this book examines the complex questions raised by the phenomenon of football as a significant cultural force in the Middle East as well as its linkages to broader political and socioeconomic processes. The establishment of football as a national sport offers significant insight into the region's historical experiences with colonialism and struggles for independence as well as the sport's vital role in local and regional politics today, whether at the forefront of popular mobilisations or as an instrument of authoritarian control. Football has also served as an arena of contestation in the formation of national identity, the struggle for gender equality and the development of the media landscape. The twelve contributions to this volume draw on extensive engagement with the existing body of literature and introduce original research questions that promise to open new directions for the study of football in the Middle East.
