Comparative Dispute Resolution Maria F. Moscati, Michael Palmer, Marian Roberts, 2020-12-25 Comparative Dispute Resolution offers an original wide ranging and invaluable corpus of chapters on dispute resolution Enriched by a broad comparative vision and a focus on the processes used to handle disputes this study adds significantly to the discourse around comparative legal studies Chapters present new understandings of theoretical comparative and transnational dimensions of the manner in which societies and their legal systems respond to difficulties in social relations *Joint Fact-Finding in Urban Planning and Environmental Disputes* Masahiro Matsuura, Todd Schenk, 2016-10-04 The days of rationalist scientific management and deference to official data are behind us The credibility of experts and the information they provide are regularly challenged officials are routinely provided with conflicting sets of facts as they plan and make decisions and decision makers and stakeholders alike are largely skeptical that technical information will adequately account for the various interests and concerns and lead to the right outcomes They struggle to reconcile technical information with other forms of knowledge and differing interests priorities and perspectives Issues like climate change are complicating matters even further as scientists and technicians must increasingly acknowledge the uncertainty and potential fallibility of their findings and highlight the dynamic nature of the systems they are explaining This book examines how groups looking to plan and make decisions in any number of areas can wade through the imperfect and often contradictory information they have to make fair efficient wise and well informed choices It introduces an emerging and very promising approach called joint fact finding JFF Rather than each stakeholder group marshaling the set of facts that best advance their respective interests and perspectives while discrediting the contradictory facts others provide groups are challenged to collaboratively generate shared sets of facts that all parties accept This book introduces readers to the theory of JFF the value it can provide and how they can adopt this approach in practice It brings together writings from leading practitioners and scholars from around the world that are at the forefront of the JFF approach to science intensive policymaking urban planning and environmental dispute resolution The first set of chapters outlines the concept of JFF and situates it within other bodies of theory and

practice The second set of case based chapters elucidates how JFF is being applied in practice This book delivers a new perspective to scholars in the field of public policy urban planning environmental studies and science and technology studies as well as public officials technical experts policy consultants and professional facilitators The Quarterly Review of Economics and Finance ,2014 **Forthcoming Books** Rose Army,2003 Guide to Microforms in Print ,1995 **Preventive Law Reporter** ,2003
