## **Medicaid Managed Care Mmc:**

Medicaid Managed Care Walter Ochinko, Karen Doran, 2000-10 Since the mid 1990s states have accelerated the enrollment of children with special needs in capitated MMC programs which deliver medical services to beneficiaries for a fixed per person fee The Balanced Budget Act BBA of 1997 continued to require Federal approval for state Medicaid programs that mandate that these children enroll This report 1 presents data on the extent to which states are enrolling children with special needs as defined in the BBA in capitated MMC plans 2 assesses the scope effectiveness of the safeguards that these states are implementing to ensure that children with special needs receive appropriate care within MMC

**Medicaid Managed Care and Infant Health** Robert Kaestner, Lisa C. Dubay, Genevieve Kenney, 2002 In this study we examine the effects of Medicaid managed care MMC on prenatal care utilization and infant health We obtain separate estimates of the effect of primary care case management PCCM managed care programs and HMO managed care plans on prenatal care utilization birth weight and cesarean section The results suggest the following MMC was associated with a small clinically unimportant decrease in the number of prenatal care visits MMC had no statistically significant relationship to the APNCU index of the adequacy of prenatal care MMC was associated with a significant increase in the incidence of low birth weight and pre term birth and MMC had no association with the incidence of cesarean section We argue that a causal interpretation of the first and third findings is unsupported by a careful reading of the evidence and we conclude that Medicaid managed care had virtually no causal effect on prenatal care use birth outcomes and cesarean section

Medicaid Managed Care, 2012 Medicaid the public health insurance program for low income people covered nearly 60 million Americans or about 1 in 5 for at least some time during FY 2008 Under the Patient Protection and Affordable Care Act ACA beginning in 2014 Medicaid will expand to cover nearly all Americans with income below 133% of the federal poverty level reaching an estimated 16 million uninsured people mostly adults by 2019 Since the early 1980s states have relied increasingly on managed care arrangements to serve their Medicaid beneficiaries Two thirds of Medicaid enrollees now receive most or all of their benefits in managed care and many states are expanding their use of managed care to additional geographic areas and Medicaid populations Given Medicaid's large and growing coverage role and the increasing dominance of managed care in the program this current profile of Medicaid managed care MMC offers a key policy resource

**Community-Based Programs and Policies** Howard A. Palley, 2014-01-02

This collection is focused on the provision of community based programs and activities in health and related long term care services that have contributed or may in the future contribute to social policy development Several of the articles in this collection deal with community based health and long term care

program and policy initiatives that have been facilitated through federal programs such as Medicare Medicaid and the Older Americans Act The implementation of some of these community based programs have significantly influenced social policy thinking regarding the beneficial effects of integrating medical and social aspects of health and long term care services as well as the health care team approach to the delivery of health and long term care services Another dimension addressed is the impact of interest groups such as family caregivers in advancing social policy that supports the efforts of community based family care givers in providing services to patients in need The underlying theme is how such local community programs have contributed in a variety of ways to the development of social policies at the community level that in many ways focus on the integration of health and related long term care services and a health care team approach to the provision of such services The book will be of interest to community development courses in Schools of Social Work and other health professions such as Nursing and Public Health It will also be of interest to health policy programs in public administration and other social sciences This book was published as a special issue of Social Work in Public Health

**Primary Care Case Management (PCCM) in Medicaid Managed Care** Robin Cohen,1999 Discusses which states use PCCM in their Medicaid managed care MMC programs and of these how many do so exclusively or in combination with risk based programs

**Has the shift to managed care reduced medicaid expenditures? : evidence from state and local-level mandates** Mark Gregory Duggan,Tamara Hayford,2011 From 1991 to 2003 the fraction of Medicaid recipients enrolled in HMOs and other forms of Medicaid managed care MMC increased from 11 percent to 58 percent This increase was largely driven by state and local mandates that required most Medicaid recipients to enroll in an MMC plan Theoretically it is ambiguous whether the shift from fee for service into managed care would lead to an increase or a reduction in Medicaid spending This paper investigates this effect using a data set on state and local level MMC mandates and detailed data from CMS on state Medicaid expenditures The findings suggest that shifting Medicaid recipients from fee for service into MMC did not reduce Medicaid spending in the typical state However the effects of the shift varied significantly across states as a function of the generosity of the state s baseline Medicaid provider reimbursement rates These results are consistent with recent research on managed care among the privately insured which finds that HMOs and other forms of managed care achieve their savings largely through reduced prices rather than lower quantities

**Grow and Hide** Colleen M. Grogan,2023 In Grow and Hide Colleen M Grogan details the history of the American health care state and argues that the public has been intentionally misled about the true role of government The US created a publicly financed system while framing it as the opposite in what Grogan terms the grow and hide regime Today the state s role is larger than ever yet it remains largely hidden because stakeholders have repeatedly and successfully

presented the illusion of minimal government involvement As Grogan reveals if we want to fix care in America we need to reimagine the way it is organized prioritized funded and perhaps most importantly discussed This book shows us a way forward
