Medical Malpractice A Preventive Approach:

Medical Malpractice William O. Robertson,1985 **Current Catalog** National Library of Medicine (U.S.),1985 First multi year cumulation covers six years 1965-70 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1985 **SNI** National Criminal Justice Reference Service (U.S.),1980 [Medical Malpractice, Prevention, Insurance and Coverage Options](#) ,2007 *Error Reduction and Prevention in Surgical Pathology* Raouf E. Nakhleh,Keith E. Volmar,2019-07-09 The 1st edition of Error Reduction and Prevention in Surgical Pathology was an opportunity to pull together into one place all the ideas related to errors in surgical pathology and to organize a discipline in error reduction. This 2nd edition is an opportunity to refine this information to reorganize the book to improve its usability and practicality and to include topics that were not previously addressed. This book serves as a guide to pathologists to successfully avoid errors and deliver the best diagnosis possible with all relevant information needed to manage patients. The introductory section includes general principles and ideas that are necessary to understand the context of error reduction. In addition to general principles of error reduction and legal and regulatory responsibilities a chapter on regulatory affairs and payment systems which increasingly may be impacted by error reduction and improvement activities was added. This later chapter is particularly important in view of the implementation of various value based payment programs such as the Medicare Merit Based Incentive Payment System that became law in 2015. The remainder of the book is organized in a similar manner to the 1st edition with chapters devoted to all aspects of the test cycle including pre analytic, analytic and post analytic. The 2nd Edition of Error Reduction and Prevention in Surgical Pathology serves as an essential guide to a successfully managed laboratory and contains all relevant information needed to manage specimens and deliver the best diagnosis. **Medicine on Trial** Charles B.
