Medical Terminology A Programmed Approach:

Medical Terminology: A Programmed Approach Paula Bostwick, Heidi Weber, 2012-01-04 The second edition of Medical Terminology A Programmed Approach has been completely updated and redesigned but the purpose of the text has not changed. The authors of this book Paula Bostwick and Heidi Weber have invested their time, research, and talents to help you succeed in learning medical terminology. Medical Terminology A Programmed Approach is designed to direct your study of medical terminology by guiding you through an organized approach to step by step learning.

Medical Terminology: A Programmed Approach w/Student CD/Flashcards/OLC Paula Bostwick, 2007-03-02 Medical Terminology A Programmed Approach is the ideal resource for instructors and students wanting a concise and systematic approach to learning the language of health care. Recognizing that students learn medical terminology by constructing and deconstructing words into their parts, the authors have built this process into the text and the numerous exercises. The approach builds and constantly reinforces skills needed to deal with increasingly complicated terms. A body systems organization is used, providing a clear content framework for the text. Each body system chapter separates words into easily learnable groups, major parts of each system, word parts related to each system, and diagnostic, pathological, surgical, and pharmacological terms. Carefully chosen chapter features help bring the subject to life and add an on the job perspective. Case study information is built into examples and real medical documents are used whenever appropriate. Internet references are included throughout to emphasize the importance of online resources and tools. While most activities are straight forward practice exercises, word building and critical thinking skills are also built in. Wherever possible, material on Complementary and Alternative Medicine (CAM) is included to highlight this growing area of medicine. In addition to the text, students can access a wealth of electronic resources to aid their studies. The Student CD ROM includes a suite of activity based learning tools: crossword puzzles, Hangman game, Concentration (term to definition matching), audio feedback, and That's Epidemic (an activity focusing on pathology terms). Exercises are gradable online or can be used for self-paced review. The Online Learning Center website (OLC) provides a set of additional self-test questions, chapter outlines, web links of interest, and additional word building activities. An optional Spanish-English audio CD ROM is available, which includes pronunciations of key medical terms in both languages. English language audio CD ROMs 2 are also available as an optional package item; these include pronunciation of all terms included in the text. Instructors will also find a wealth of teaching PowerPoint presentations for each chapter and an electronic test generator and test banks with 300 questions.
