The book's 35 chapters are divided into four parts: Part I Inpatient Practice focuses on specialty psychiatric units, e.g. acute stabilization unit, eating disorders unit, forensic unit, child unit, including the many psychopharmacological and psychosocial treatments used within each. This section also touches on specialized treatment for patients with co-occurring problems such as substance abuse, developmental disabilities, and legal difficulties. Part II Special Clinical Issues covers clinical issues from the perspective of different populations: consumers, families, suicidal patients. This section also examines the recent trend toward patient-centered care. Part III The Continuum of Care addresses psychiatric services within the community such as rehabilitation programs, day hospitals, and emergency services. It discusses the importance of understanding hospital-based treatment within the broader perspective of patients' lives. Part IV Structure and Infrastructure focuses on such often overlooked topics as financing of care, risk management, electronic medical records, and the actual architecture of psychiatric hospitals as well as the roles of psychiatric hospital administrators, psychiatric nurses, and psychiatrists and psychologists.
