Medieval Regions And Their Cities:

Medieval Regions and Their Cities Josiah Cox Russell, 1972 Medieval Regions and Their Cities Josiah Cox Russell, 1972 Sovereign City Geoffrey Parker, 2004 This title provides an examination of the rise evolution and decline of the city state from ancient times to the present day **The City and the Realm: Burgos and Castile, 1080-1492** Teofilo F. Ruiz, 2024-10-28 The articles in the first part of this volume two being a revised English version of an article originally in Spanish examine the place of the city in the historical development of Castile The focus is the social and economic history of Burgos and the work is founded on detailed research in the archives of the area Professor Ruiz also calls into question the long held belief in the democratic character of medieval Castilian municipal life In the second section he opens the field of enquiry to deal with the controversial question of what impact the conquest of Seville and the subsequent settlement of al Andalus had on the realm of Castile looking in particular at demographic factors and the emergence of the latifundia The following articles analyse the symbolism and ceremonial of royal power arguing that the claims for a sacred monarchy so usual in the medieval West were absent during this period of Spanish history and that the kings used popular secular ceremonies not anointments or coronations to legitimise their rule The book then closes with a study of the origins of the Spanish Inquisition Les travaux contenus dans la première partie de cet ouvrage examinent la place de la Cité dans le développement historique de la Castille L'introduction centrale porte sur l'histoire sociale et économique de Burgos et l'analyse est fondée sur une recherche détaillée dans les archives de cette région Le professeur Ruiz remet aussi en question la croyance que l'on avait depuis longtemps quant au caractère démocratique de la vie municipale dans la Castille médiévale Dans la seconde partie l'auteur largit le champ de l'enquête afin de traiter de la question controversée au sujet de l'impact de la conquête de Séville et l'occupation consécutive d'al Andalus sur le royaume de Castille s'intéressant en particulier aux facteurs démographiques et l'émergence de latifundia Les études suivantes analysent le symbolisme Music and Musicians in Renaissance Cities and Towns Fiona Kisby, 2001-04-19 Examines musical culture in the towns and cities of Renaissance Europe and the New World Agriculture and Rural Society after the Black Death Ben Dodds, Richard Britnell, 2009-04-01 With special emphasis on the period following the Black Death this new collection of essays explores agriculture and rural society during the late Middle Ages Combining a broad perspective on agrarian problems such as depopulation and social conflict with illustrative material from detailed local and regional research this compilation demonstrates how these general problems were solved within specific contexts The contributors supply detailed studies relating to the use of the land the movement of prices the distribution of property the organization of trade and the cohesion of village society among other issues New research on regional development in medieval England and other European countries is also discussed **The Cathars** Malcolm Barber, 2014-06-17 The Cathars are one of the most famous heretical movements of the late twelfth and early thirteenth centuries They infiltrated the highest ranks of society and posed a major threat not only to the Catholic Church but also to

secular authorities as well The movement was finally smashed by the crusade and the inquisitional proceedings that followed This new study is the first comprehensive history of the Cathars It addresses major topics in medieval history including heresy orthodoxy and the Crusades as well as providing a history of the social and political history of Languedoc and the rise of the Capetian dynasty A fascinating study of the development of radical religious belief and its violent suppression
