Medieval Religious Women: Peace weavers John A. Nichols, Lillian Thomas Shank, 1984 *Medieval Religious Women: Peaceweavers* John A. Nichols, Lillian Thomas Shank, 1984 *Medieval religious women* ed NICHOLS, 1984 Saint Hugh of Lincoln David Hugh Farmer, 1985 *Peaceweavers*, 1988 **The Enclosed Garden and the Medieval Religious Imaginary** Liz Herbert McAvoy, 2021 During the Middle Ages the arresting motif of the walled garden especially in its manifestation as a sacred or love inflected hortus conclusus was a common literary device Usually associated with the Virgin Mary or the Lady of popular romance it appeared in myriad literary and iconographic forms largely for its aesthetic decorative and symbolic qualities This study focuses on the more complex metaphysical functions and meanings attached to it between 1100 and 1400 and in particular those associated with the gardens of Eden and the Song of Songs Drawing on contemporary theories of gender gardens landscape and space it traces specifically the resurfacing and reworking of the idea and image of the enclosed garden within the writings of medieval holy women and other female coded texts In so doing it presents the enclosed garden as generator of a powerfully gendered hermeneutic imprint within the medieval religious imaginary indeed as an alternative language used to articulate those highly complex female coded approaches to God that came to dominate late medieval religiosity The book also responds to the eco turn in our own troubled times that attempts to return the non human to the centre of public and private discourse The texts under scrutiny therefore invite responses as both literary and garden spaces where form often reflects content and where their authors are also diligent gardeners the apocryphal Lives of Adam and Eve for example the horticulturally inflected Hortus Deliciarum of Herrad of Hohenburg and the green philosophies of Hildegard of Bingen s Scivias the visionary writings of Gertrude the Great and Mechthild of Hackeborn collaborating within their Helfta nunnery the Middle English poem Pearl and multiple reworkings of the deeply problematic and increasingly sexualized garden enclosing the biblical figure of Susanna *The Convent and the Community in Late Medieval England* Marilyn Oliva, 1998 Detailed study of female monasticism in the later middle ages with particular emphasis on the nuns importance to the local community Convents were an important part of medieval monastic life but only now with the upsurge of interest in women s history are they beginning to receive the attention they deserve The prevailing view has been that female monasticism was bankrupt spiritually and socially as well as financially but Professor Oliva shows the reality to have been otherwise In her study of the eleven female monasteries in the diocese of Norwich between 1350 1540 the convents emerge as integral parts of the local social and spiritual landscape with nuns more active in the local community than their male counterparts and markedly more popular with parish gentry and yeoman farmers as their wills prove The majority of nuns are shown to have been from these parish gentry families not from the upper gentry or aristocracy as has been thought and the records of their active lives so rewardingly examined here reveal mobility within the nunnery too the existence of a career ladder enabling nuns to progress to more important and prestigious household offices

Perceptions of Femininity in Early Irish Society Helen Oxenham, 2016 An examination of how the feminine was
 viewed in early medieval Ireland through a careful study of a range of texts *The Female Mystic* Andrea Janelle
 Dickens, 2009-05-30 The Middle Ages saw a flourishing of mysticism that was astonishing for its richness and distinctiveness
 The medieval period was unlike any other period of Christianity in producing people who frequently claimed visions of Christ
 and Mary uttered prophecies gave voice to ecstatic experiences recited poems and songs said to emanate directly from God
 and changed their ways of life as a result of these special revelations Many recipients of these alleged divine gifts were
 women Yet the female contribution to western Europe s intellectual and religious development is still not well understood
 Popular or lay religion has been overshadowed by academic theology which was predominantly the theology of men This
 timely book rectifies the neglect by examining a number of women whose lives exemplify traditions which were central to
 medieval theology but whose contributions have tended to be dismissed as merely spiritual by today s scholars In their
 different ways visionaries like Richeldis de Faverches founder of the Holy House at Walsingham or England s Nazareth the
 learned Hildegard of Bingen Hadewijch of Brabant exemplary voice of the Beguine tradition of love mysticism charismatic
 traveller and pilgrim Margery Kempe and anchoress Julian of Norwich all challenged traditional male scholastic theology
 Designed for the use of undergraduate student and general reader alike this attractive survey provides an introduction to
 thirteen remarkable women and sets their ideas in context Honour, Exchange and Violence in Beowulf Peter Stuart
 Baker, 2013 Argues for a new reading of Beowulf in its contemporary context where honour and violence are intimately linked
 This book examines violence in its social setting and especially as an essential element in the heroic system of exchange
 sometimes called the Economy of Honour It situates Beowulf in a northern European culture where violence was not
 stigmatized as evidence of a breakdown in social order but rather was seen as a reasonable way to get things done where
 kings and their retainers saw themselves above all as warriors whose chief occupation was the pursuit of honour and where
 most successful kings were those perceived as most predatory Though kings and their subjects yearned for peace the
 political and religious institutions of the time did little to restrain their violent impulses Drawing on works from Britain
 Scandinavia and Ireland which show how the practice of violence was governed by rules and customs which were observed

with variations over a wide area this book makes use of historicist and anthropological approaches to its subject It takes a neutral attitude towards the phenomena it examines but at the same time describes them fortnightly avoiding euphemism and excuse making on the one hand and condemnation on the other In this it attempts to avoid the errors of critics who have sometimes been led astray by modern assumptions about the morality of violence PETER S BAKER is Professor of English at the University of Virginia

Medieval Religious Women John A. Nichols,eds Lillian Thomas Shank,1995

Women in the Middle Ages: A-J Katharina M. Wilson,Nadia Margolis,2004 The encyclopedia covers the myriad experiences and contributions of women in the medieval world

The Age of Abbesses and Queens Dick Harrison,1998 Through an analysis of narrative sources from the fifth to the eighth century this book shows how a specific female political culture was formed

Sainted Women of the Dark Ages Jo Ann McNamara,John E. Halborg,E. Gordon Whatley,1992-03-27 *Sainted Women of the Dark Ages* makes available the lives of eighteen Frankish women of the sixth and seventh centuries all of whom became saints Written in Latin by contemporaries or near contemporaries and most translated here for the first time these biographies cover the period from the fall of the Roman Empire and the conversion of the invading Franks to the rise of Charlemagne's family Three of these holy women were queens who turned to religion only after a period of intense worldly activity Others were members of the Carolingian family deeply implicated in the political ambitions of their male relatives Some were partners in the great Irish missions to the pagan countryside and others worked for the physical salvation of the poor From the peril and suffering of their lives they shaped themselves as paragons of power and achievement Beloved by their sisters and communities for their spiritual gifts they ultimately brought forth a new model of sanctity These biographies are unusually authentic At least two were written by women who knew their subjects while others reflect the direct testimony of sisters within the cloister walls Each biography is accompanied by an introduction and notes that clarify its historical context This volume will be an excellent source for students and scholars of women's studies and early medieval social religious and political history

Peace and Negotiation Arizona Center for Medieval and Renaissance Studies. Conference,2000 Peace was far from a pale static concept a simple lack of violence in the Middle Ages and Renaissance Rather it was at times constructed as a rich and complex positive and dynamic ideal The thirteen articles in this volume cover a broad range of disciplines times and geographical areas and explore strategies that were used in the past to resolve conflict and attain peace They examine events texts and images that date from the fifth through the sixteenth centuries and their authors focus not only on Western Europe but also on Scandinavia the Caucasus and Egypt This volume rests on the assumption that peace covers a spectrum of situations that connects the personal and the political Therefore the papers presented here examine not only how nations negotiated peace but also how individuals did Similarly although several essays spotlight those in the seat of power others explore those who are politically marginalized our views about peace and conflict as this collection makes clear are shaped in part by the mentalities of the past Although some peacemaking strategies may be

unacceptable to us today forced marriages and conversions for example we can learn from other strategies how to transcend or modify various modes of antagonistic thinking Land of Women Lisa M. Bitel, 1996 In the process she explains the often conflicting ideas about women expressed by the writers of medieval Irish texts a small group of literate men vowed to a religion that has always been ambivalent toward the female sex which derived from both Christian and secular Celtic heritages She concludes by examining the violent and powerful images of women common in the medieval literature of Ireland asking why men's texts consistently depicted women negatively when men and women interacted in a wide variety of ways *The Feminine Images of God in the Visions of Saint Hildegard of Bingen's 'Scivias'* Carolyn Wörman Sur, 1993
