Social Media Literacy Tips:

The Critical Media Literacy Guide Douglas Kellner, Jeff Share, 2019-05-20 Over half the world's population is now online interconnected through a globally networked media and consumer society. The convergence of information media and technology has created the predominant ecosystem of our time. Yet most educational institutions are still teaching what and how they have for centuries and are thus increasingly out of date and out of touch with our current needs. The Critical Media Literacy Guide: Engaging Media and Transforming Education provides a theoretical framework and practical applications for educators and teacher education programs to transform education by putting critical media literacy into action in classrooms with students from kindergarten to university. Douglas Kellner and Jeff Share lay out the evolution of thinking and development of media and cultural studies from the Frankfurt School to current intersectional theories about information and power that highlight the importance of race, gender, class, and sexuality. They provide insightful and accessible entry into theorizing education and information communication technologies through linking the politics of representation with critical pedagogy. The increase in fake news, alternative facts, bots, and trolls challenge our abilities to judge credibility and recognize bias. Kellner and Share present a critical lens and strategies to contextualize and analyze the dominant ideologies going viral across social media platforms and disseminated globally from enormous transnational corporations. The Critical Media Literacy Guide is a powerful resource to analyze and challenge representations and narratives of multiple forms of identity, privilege, and oppression. Since the struggle for social justice and democracy requires new theories and pedagogies to maneuver the constantly changing terrain, this book is essential for all educators.

TESOL Guide for Critical Praxis in Teaching, Inquiry, and Advocacy Crawford, Jenifer, Filback, Robert A., 2021-09-17 The field of TESOL encompasses English teachers who teach English as an additional language in English dominant countries and those teachers who teach English as a foreign language in countries where a language other than English is the official language. This range of educators teaches English to children, adolescents, and adults in primary, secondary, post secondary, popular education, and language academies or tutoring centers. The diversity of learners and contexts within the TESOL field presents a unique opportunity for educators to address varied educational and societal needs. This opportunity calls for TESOL educators who can support the whole learner in a range of contexts for the greater social good. There is an urgent need for readily reproducible and step by step research based practices and current standards in TESOL that bridge the gap between critical scholarship and equitable teaching practices. This book would serve as a critical addition to current literature in TESOL. *TESOL Guide for Critical Praxis in Teaching, Inquiry, and Advocacy* is an essential reference that provides practical and equitable step by step guides for TESOL educators through the current best practices and methods for effective and equity minded teaching, critical inquiry, and transformative advocacy. Misguided Matthew Facciani, 2025-07-08 Why are people inclined to believe misinformation? This wide-ranging and comprehensive book shines a light on how false beliefs take root and spread, exploring the cognitive, emotional, and social factors that make us all susceptible to misinformation. Challenging approaches that focus solely on education and media literacy, Matthew Facciani emphasizes the important role identities and social ties have in the complex interplay of forces that lead people to believe things that are not true. Susceptibility to misinformation is largely shaped by social dynamics. The pressure to affirm one's personal and group identities can leave individuals vulnerable to false beliefs. Facciani examines both offline and online connections, highlighting how social media, news media, and personal networks can promote and amplify false claims. To bring social scientific findings to life, he shares the stories of people who fell for misinformation, with contemporary examples including the COVID-19 pandemic and the antivaccine movement. Facciani examines the effectiveness of various approaches to combating misinformation, underscoring the importance of understanding the psychological and sociological mechanisms behind its spread. He provides actionable recommendations for reducing the influence of misinformation at all levels, from having productive conversations with friends and family to rebuilding trust in institutions.
