Mediaeval Empire Idea Reality:

A History of Early Medieval Europe Margaret Deanesley, 2019-06-26 Originally published in 1956 A History of Early Medieval Europe traces the changes that took place in Europe between the fifth and tenth centuries a time of social and political upheaval when the organization of the Roman Empire with its single emperor army and civil service was replaced by the divided Europe of the Germanic kingdom in the west and the Byzantine empire in the east *Political Representation in the Later Middle Ages* Hwa-Yong Lee, 2008 This book explores the theory of political representation as articulated by the fourteenth century Italian thinker Marsilius It combines historical research on Marsilius with an analysis of the contemporary theory of representative democracy Modern theorization of political representation identifies the relation between the represented and the representative as a central theme In order to assess how a representative system can reasonably be expected to operate for the benefit of the whole people political representation must be understood through a comprehensive conception of the political process as a whole To this end Marsilius provides us with a perspective from which to examine the philosophical foundations of political representation and to reconsider the nature and significance of political representation that is an understanding of political representation in terms of the transfer of power This book suggests that in modern democratic societies where the people effectively cease to be a political agent and their formal authority becomes increasingly notional Marsilius conception of political representation which rejects the depoliticisation and deauthorisation of ordinary citizens has much to offer It can in principle offer a coherent alternative approach to building political representation as an effective scheme of public action for all

Empires, Systems and States Michael Cox, Timothy Dunne, Ken Booth, 2001 This volume brings together a collection of leading scholars to consider various dimensions of the turn to history in International Relations The scope of this volume is broad It includes conventional accounts of the development of the European states system but is not limited by it Other essays consider the non European experience a number of path breaking essays on how other cultures and continents have ordered their political communities in particular the question how and why a states system triumphed over other forms of political organisation The theme of the subtitle great transformations is pursued by each author The essays consider one of the biggest questions of our time namely how did we arrive at this historical and institutional expression of political community And what alternative future world orders exist The volume will be of interest to scholars of International Relations and History interested in great transformations in world politics

Mediaev. Stud , 1960 **The Medieval Empire** Herbert Albert Laurens Fisher, 1898 *European Legal History* Randall Lesaffer, 2009-06-25 The rediscovery of Roman law and the emergence of classical canon law around AD 1100 marked the beginnings of the civil law tradition in Europe Between the twelfth and eighteenth centuries a highly sophisticated legal science of a truly European dimension was developed Since then the different European States have developed their own national legal systems but with the exception of England and Ireland they are all heirs to this tradition of

the ius commune This historical introduction to the civil law tradition from its original Roman roots to the present day considers the political and cultural context of Europe's legal history Political, diplomatic and constitutional developments are discussed and the impacts of major cultural movements such as scholasticism, humanism, the Enlightenment and Romanticism on law and jurisprudence are highlighted This contextual approach makes for a fascinating story accessible to any reader regardless of legal or historical background

Later Medieval Europe Daniel Waley, Peter Denley, 2013-11-26 From the divine right of kings to the political philosophies of writers such as Machiavelli, the medieval city states to the unification of Spain, Daniel Waley and Peter Denley focus on the growing power of the state to illuminate changing political ideas in Europe between the thirteenth and sixteenth centuries. Spanning the entire continent and beyond and using contemporary voices wherever possible, the authors include substantial sections on economics, religion and art and how developments in these areas fed into and were influenced by the transformation of political thinking. The new edition takes the narrative beyond the confines of western Europe with chapters on East Central Europe and the Teutonic Knights and the Portuguese expansion across the Atlantic. The third edition of this classic introduction to the period includes even greater use of contemporary voices, full reading lists and new chapters on East Central Europe and Portuguese exploration. Suitable as an introductory text for undergraduate courses in Medieval Studies and Medieval European History

The Political Ideas of Nicholas of Cusa Morimichi Watanabe, 1963 **Images and Ideas in the Middle Ages** Gerhart Burian Ladner, 1983 **History of Political Ideas** Eric Voegelin, 1997

The series will publish all of philosopher Voegelin's 1901-1985 works, including the previously unpublished multi-volume **History of Political Ideas** of which this is the second volume. Completed in 1944, it is not a conventional chronological account but an original comprehensive account of the political thought and experiential underpinnings that typified the medieval period. A survey of the structure of the period is followed by analysis of the Germanic invasions, the fall of Rome and the rise of empire and monastic Christianity, climaxing in a study of Saint Thomas Aquinas.
