Color Atlas of Allergic Diseases Martin Rocken, Gerhard Grevers, 2011-01-01 Allergic disease, which frequently affects children, adolescents, and young adults, has seen an alarming increase in recent years. At the same time, an explosion of clinical and scientific advances in immunology and allergology have made it imperative that practitioners keep up with the newest knowledge. Unique in its scope, size, and format, here is a practical and current overview of the entire field of allergy. This succinct book incorporates colorful and educational illustrations throughout, with succinct information on complex cell-mediated immune response, methods of in vivo and in vitro allergy diagnosis, antihistamine and corticosteroid treatments, prophylaxis, and allergen avoidance, psychosomatic disease, and much more. The book is part of Thieme's acclaimed Flexibook series of clinical and basic science pocket guidebooks, which are sold worldwide and have been translated into more than 20 languages. Unique features of this pocket atlas: Nearly 100 full-color illustrations that convey complex information simply and effectively. A wealth of concise and focused information in less than 250 pages, textbook knowledge in a pocketbook format. Thorough diagnostic guidelines that incorporate the multidisciplinary expertise of a wide variety of specialists. An extensive Appendix that covers current topics such as emergency management, patch testing, allergy medications, and more. From basic allergy principles to diagnosis, treatment, organ-specific allergies, prevention, and more, this compact book comprehensively covers the field. It is essential for any specialist who needs a thorough understanding of allergy medicine: otorhinolaryngologists, dermatologists, internists, pediatricians, pulmonologists, as well as medical students. Use this beautifully illustrated pocket guide to keep up to date on an important clinical topic.

Fundamental Immunology William E. Paul, 2012-12-03 This standard-setting textbook has defined the field of immunology since 1984 and is now in its Seventh Edition, continuing to deliver the detailed, authoritative, and timely coverage readers expect. This comprehensive, up-to-date text is ideal for graduate students, postdoctoral fellows, basic and clinical immunologists, microbiologists, and infectious disease physicians, and any physician treating diseases in which immunologic mechanisms play a role. Now full-color throughout, the book's fully revised and updated content reflects the latest advances in the field. Current insights enhance readers' understanding of immune system function. The text's unique approach bridges the gap between basic immunology

and the disease process Extensive coverage of molecular biology explains the molecular dynamics underlying immune disorders and their treatment Abundant illustrations and tables deliver essential information at a glance Plus a convenient companion website features the fully searchable text and image bank This is the tablet version of *Fundamental Immunology* which does not include access to the supplemental content mentioned in the text

Lipid Mediators in the Immunology of Shock M. Paubert-Braquet, P. Braquet, B. Demling, R. Fletcher, M. Foegh, 2011-10-12 This book contains the proceedings of the ARW NATO conference on Lipid Mediators in Immunology of Burn and Sepsis held in Helsingør Denmark July 20-25 1986 This meeting brought together some of the most distinguished researchers in the fields of thermal injury the immune system and lipid mediator biochemistry It is well known that there is a substantial impairment of the immune response during sepsis burn trauma and other kinds of shock These conditions are characterized by a massive inflammatory process which occurs during the early phase following injury Among the various mediators released at this time are leukotrienes thromboxane histamine and platelet activating factor This latter autotoxin possesses potent proinflammatory properties and together with the other mediators may account for some of the post injury pathophysiology phenomena such as extravasation hypotension chemotaxis It is of great interest to note that recently leukotrienes and platelet activating factor have been shown to be potent mediators of the immune response Thus the purpose of this meeting was to bring together clinicians immunologists and biochemists in order to examine and hopefully clarify the putative role of various lipid mediators prominent in the early stages after injury This book is divided into the following six sections Section 1 provides a general overview of the physiological consequences of burn sepsis and shock
