Education, Science and Research in Medieval England Lena Meyer, 2015-05-11 Seminar paper from the year 2014 in the subject Didactics for the subject English History of Literature Eras grade 1 0 University of Cologne language English abstract This paper deals with the spaces methods and contents of learning and studying in medieval England About 120 schools are known to have existed in England during the period between the Norman Conquest in 1066 and the Reformation in 1517 Orme 1976 XI However such numbers must remain vague and can only offer limited insight into medieval English learning This is partly due to the relatively low amount of source material but also the wide range of highly differing institutions which were all referred to with the term school c f ibid 2f Still some distinctions can be made and similarities can be found in almost all medieval English schools mostly involving the curricula manners of education and the people teaching at and attending schools Additionally academic institutions had a high social impact on their respective surroundings c f ibid 32f Grant pleads against the underestimation of medieval scientific knowledge by stating that contrary to prevailing opinion the roots of modern science were planted in the ancient and medieval world long before the Scientific Revolution Grant I Similar to detecting distinct school forms the respective fields of medieval science are hard to define there was medical as well as artistic and literary knowledge and science did not necessarily involve a strict reading of the Bible c f ibid 33f 22 Interestingly enough English was not as commonly used in scientific contexts as it is today the language of science was Latin and therefore its most important basis c f Taavitsainen a Pahta 2004 XV Many ancient manuscripts were not only rediscovered but also translated and adapted providing medieval scholars with thought provoking impulse c f Horobin a Smith 2002 167 Still most of these sources were heavily fragmented and religious schools and monasteries remained the rather enclosed centers of knowledge c f ibid Grant 22

Schools and Schooling in Late Medieval Germany David Sheffler, 2008-06-30 Historians have traditionally studied late medieval

education backward through the eyes of religious and political reformers critical of that which preceded them This has led to significant distortions Histories written from this perspective tend to overemphasize the novelty of early modern educational reforms at the expense of evident continuities and focus on conflict between ecclesiastical and lay authorities rather than cooperation This book focuses instead on the medieval experience of education through a detailed reconstruction of the educational landscape of late medieval Regensburg The resulting picture provides new insights into the relationship between civic authorities and ecclesiastical institutions the role of education in social and economic mobility and the connections between local communities and broader European educational structures

Humanism and Education in Medieval and Renaissance Italy Robert Black, 2001-09-20 Based on the study of over 500 surviving manuscript school books this comprehensive 2001 study of the curriculum of school education in medieval and Renaissance Italy contains some surprising conclusions Robert Black's analysis finds that continuity and conservatism not innovation characterize medieval and Renaissance teaching The study of classical texts in medieval Italian schools reached its height in the twelfth century this was followed by a collapse in the thirteenth century an effect on school teaching of the growth of university education This collapse was only gradually reversed in the two centuries that followed it was not until the later 1400s that humanists began to have a significant impact on education Scholars of European history of Renaissance studies and of the history of education will find that this deeply researched and broad ranging book challenges much inherited wisdom about education humanism and the history of ideas
