Medieval Pottery:

Medieval Pottery in Britain, AD 900-1600 Michael Robin McCarthy, Catherine Margery Brooks, 1988 *Medieval English Pottery* Bernard Rackham, 1949 **Pottery and Social Dynamics in the Mediterranean and Beyond in Medieval and Post-medieval Times** John L. Bintliff, Marta Carosco, 2013 The papers collected here were originally given at a symposium during the European Archaeology Conference at Lake Garda Italy in 2009 They have been revised and updated for this volume Medieval and Post Medieval ceramic studies have now for some decades been in the forefront of the archaeology of those periods showing not only fascinating interactions with historical sources in which both disciplines contribute novel information for each other but also constantly exhibiting original methods and theories for the wider benefit of ceramology and archaeology in general **Medieval Pottery** Medieval Pottery Research Group, 1989 *The Art of Ceramics* Howard Coutts, 2001-01-01 The great age of European ceramic design began around 1500 and ended in the early 19th century with the introduction of large scale production of ceramics In this illustrated history with nearly 300 color and black and white photos and reproductions curator Howard Coutts considers the main stylistic trends Renaissance Mannerism Oriental Rococo and Neoclassicism as they were represented in such products as Italian Majolica Dutch Delftware Meissen and S vres porcelain Staffordshire and Wedgwood pottery He pays close attention to changes in eating habits over the period particularly the layout of a formal dinner and discusses the development of ceramics as room decoration the transmission of images via prints marketing of ceramics and other luxury goods and the intellectual background to Neoclassicism *A Guide to the Classification of Medieval Ceramic Forms*, 1998 Post-medieval Pottery, 1650-1800 Jo Draper, 2008-03-04 The period from 1650 to 1800 is the most interesting and complex time in the development of English ceramics with new types of pottery being developed all through that period and with porcelain being made in Britain for the first time Wares ranged from the simple everyday earthenwares of the local potters up to the sophisticated products of Staffordshire and the porcelain factories This book combines the art historical or collector s approach with archaeologically excavated material Methods of production and decoration are explained and contemporary imports discussed Over a hundred pots are illustrated and a further reading list is included About the author Jo Draper was born in Hampshire She has published many archaeological reports and an even larger number of pottery reports Archaeologically excavated pottery led her to an interest in all ceramics especially those of the post medieval period Her work includes archaeology museums creating exhibitions and writing *Pottery and Social Life in Medieval England* Ben Jervis, 2014-07-31 How can pottery studies contribute to the study of medieval archaeology How do pots relate to documents landscapes and identities These are the questions addressed in this book which develops a new approach to the study of pottery in medieval archaeology Utilising an interpretive framework which focuses upon the relationships between people places and things the effect of the production consumption and discard of pottery is considered to see pottery not as reflecting medieval life but as one actor which contributed to the

development of multiple experiences and realities in medieval England By focussing on relationships we move away from viewing pottery simply as an object of study in its own right to see it as a central component to developing understandings of medieval society The case studies presented explore how we might use relational approaches to re consider our approaches to medieval landscapes overcome the methodological and theoretical divisions between documents and material culture and explore how the use of objects could have multiple implications for the formation and maintenance of identities The use of this approach makes this book not only of interest to pottery specialists but also to any archaeologist seeking to develop new interpretive approaches to medieval archaeology and the archaeological study of material culture **MEDIEVAL**
