The Complete Guide to Modern Dance Don McDonagh,1976

Culture, Inculturation, and Theologians Gerald A. Arbuckle,2010-09-01 The split between the Gospel and culture is without doubt the drama of our time wrote Paul VI in 1975 Since that time there has been an increasingly urgent awareness that inculturation is an indispensable task of the church But inculturation the dialogue between church and cultures demands first of all that we who would enter into the dialogue understand what culture itself means and what dialogue entails To that end cultural anthropologist Father Gerald Arbuckle gives us this important volume

He traces the history of the development of the concept of culture and the too often negative rarely positive effects of encounters between church and culture He explores how Jesus Christ approached the cultures of his time and outlines the current treatment of culture and inculturation in church documents and in Catholic theology He shows that modest progress in understanding has recently stalled and there are even forces working to turn that progress into regress He concludes with a description of inculturation as it needs to happen and a sharp critique of those who resist With a sense of prophetic hope Arbuckle seeks to help us bridge the lamentable split between Gospel and culture the drama that continues to unfold in our time

The Exact Sciences in Antiquity Otto Neugebauer,1969-01-01

Based on a series of lectures delivered at Cornell University in the fall of 1949 and since revised this is the standard non technical coverage of Egyptian and Babylonian mathematics and astronomy and their transmission to the Hellenistic world Entirely modern in its data and conclusions it reveals the surprising sophistication of certain areas of early science particularly Babylonian mathematics After a discussion of the number systems used in the ancient Near East contrasting the

Egyptian method of additive computations with unit fractions and Babylonian place values Dr Neugebauer covers Babylonian

tables for numerical computation approximations of the square root of 2 with implications that the Pythagorean Theorem was known more than a thousand years before Pythagoras Pythagorean numbers quadratic equations with two unknowns special cases of logarithms and various other algebraic and geometric cases Babylonian strength in algebraic and numerical work reveals a level of mathematical development in many aspects comparable to the mathematics of the early Renaissance in Europe This is in contrast to the relatively primitive Egyptian mathematics In the realm of astronomy too Dr Neugebauer describes an unexpected sophistication which is interpreted less as the result of millennia of observations as used to be the interpretation than as a competent mathematical apparatus The transmission of this early science and its further development in Hellenistic times is also described An Appendix discusses certain aspects of Greek astronomy and the indebtedness of the Copernican system to Ptolemaic and Islamic methods Dr Neugebauer has long enjoyed an international reputation as one of the foremost workers in the area of premodern science Many of his discoveries have revolutionized earlier understandings In this volume he presents a non technical survey with much material unique on this level which can be read with great profit by all interested in the history of science or history of culture 14 plates 52 figures [Encyclopedia of Vampire Mythology](#) Theresa Bane,2017-02-10 From the earliest days of oral history to the present the vampire myth persists among mankind s deeply rooted fears This encyclopedia with entries ranging from Abchanchu to Zmeus includes nearly 600 different species of historical and mythological vampires fully described and detailed
